

Michigan Financial Focus

March 2000

A Letter to the Citizens of Michigan From the Governor

I am pleased to issue the fourth edition of the Michigan Financial Focus, an annual report to keep citizens informed of trends in Michigan's financial status and the health of our state's checkbook. I hope you will use this report to learn more about the financial condition and operations of your state government.

Fiscal year 1999 (October 1, 1998 - September 30, 1999) marked another successful year for Michigan. Our economy continues to prosper and the state's fiscal health remains strong.

- Since 1991, 31 tax cuts have saved Michigan taxpayers and businesses \$15 billion. In March 2000, five new tax cuts were signed into law which are expected to save Michigan taxpayers \$167.4 million in fiscal year 2000 and \$94.9 million in fiscal year 2001.
- The personal income tax is being reduced from 4.3% to 3.9% over next four years. For the tax year 2000, the income tax rate cut is accelerated from 4.3% to 4.2% which should save taxpayers an estimated \$134.7 million.
- To further reduce our tax burden to business owners, in July 1999, I signed a bill that will phase out and eliminate the Single Business Tax (SBT). The SBT rate will be reduced by 0.1 percent each year beginning January 1, 1999, until it is completely phased out in 2023.
- As of fiscal year 1999, the General Fund reported

an "unreserved" fund balance of \$189.2 million before it was transferred to the Budget Stabilization Fund. The balance in the Budget Stabilization Fund is \$1.2 billion, which continues to be one of the largest rainy day funds in the nation.

- Education continues to be the state's highest priority and total state and local K-12 spending will exceed \$13.2 billion by fiscal year 2001. Prior to Proposal A, inequities in school funding ranged from \$3,400 to \$10,300 per pupil. By the year 2003, education spending in all districts will climb to \$6,500 per pupil.
- In June 1999, I signed the "Michigan Merit Award Scholarship Act" into law. The Michigan Merit Award Scholarship is a new merit-based scholarship of \$2,500 for high school students who meet or exceed state standards on the Michigan Educational Assessment Programs High School Test.
- Our efforts to reform welfare continue with great success. From September 1992 to February 2000, the number of Family Independence Program (formerly AFDC) cases decreased 63%, compared to a national average decrease of approximately 40%. In February 2000, Michigan's caseload was below 75,000.
- Unemployment taxes for employers were cut by \$200 million for the year 2000, marking the fifth year in a row these taxes have been cut.

- Michigan's average unemployment rate of 3.7 percent for the year 1999 was better than the national average rate of 4.2 percent. Michigan's unemployment rate was better than the U.S. for 54 months in a row. The unemployment rate in February 2000 reached a new record low of 2.7 percent - the lowest ever recorded in the state.
- In 1999, Standard & Poors, Moody's, and Fitch IBCA, the three major credit rating agencies, rated the state's credit at AA+, Aa1, and AA+, respectively, the highest ratings in over 20 years.

The bottom line: Michigan's finances have never been better.

For more information, you can access the fiscal year 2001 Executive Budget and other information about state government at the Department of Management and Budget (DMB) Internet home page: <http://www.state.mi.us/dmb/budget>. If you have any comments or questions concerning this report or would like a copy of the State of Michigan Comprehensive Annual Financial Report (SOMCAFR), from which most of this summary was compiled, please call the Office of Financial Management at (517) 373-3029 or visit us at the above website.

March 31, 2000

Revenues & Expenditures

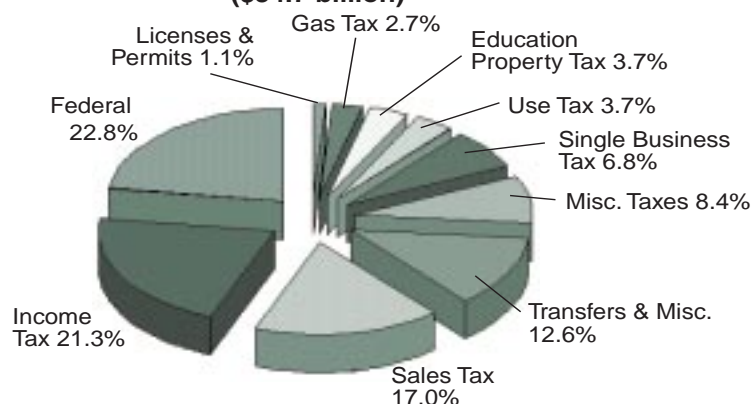

Costs for Michigan's general governmental operations are accounted for in the General Fund and 34 Special Revenue Funds. Total revenue and other sources of funds for the general governmental operations for fiscal year 1999 were \$34.7 billion. The two largest revenue components include taxes of \$22.0 billion and revenues from the federal government comprising another \$7.9 billion.

Personal income taxes of \$7.4 billion are the largest tax revenue source for financing state government expenditures in fiscal year 1999. Sales taxes of \$5.9 billion are the second largest tax collected by the state and single business taxes of \$2.4 billion are the third largest tax revenue.

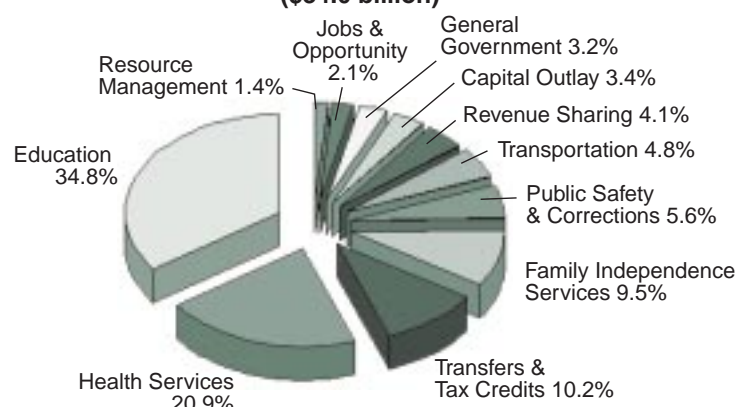

Expenditures and operating transfers of funds for governmental operations totaled \$34.0 billion of which \$11.8 billion supports K-12 and higher education and \$7.1 billion supports health services.

The accompanying graphs show the breakdown of fiscal year 1999 revenues and expenditures, including transfers to and from other funds, and other sources and uses of funds. For more information regarding revenues and expenditures, please review our SOMCAFR by logging on the website: <http://www.state.mi.us/dmb/ofm>.

FY 1999 Revenues
(\$34.7 billion)

FY 1999 Expenditures
(\$34.0 billion)

Budget Stabilization "Rainy Day" Fund

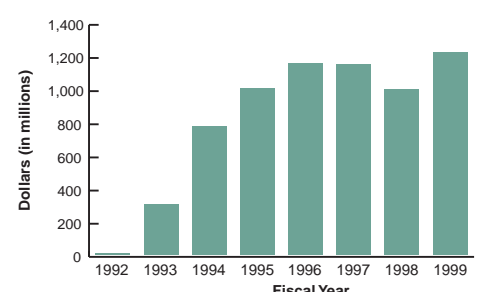

Michigan's "Rainy Day Fund," formally referred to as the Counter-Cyclical Budget and Economic Stabilization Fund, was established in 1977 to serve as the state's "savings" account. The fund balance has increased from \$20 million in 1992 to \$1.2 billion today.

During 1999, the fund received transfers of \$244.4 million from the General Fund. The transfers consisted of "unreserved" fund balance of \$189.2 million as of September 1999 and \$55.2 million as of September 1998.

During fiscal year 1999, \$73.7 million was transferred out of the Budget Stabilization Fund to the School Aid Fund, which supports K-12 education throughout the state. This amount was transferred to school districts and intermediate school districts as a part of resolving a long-standing legal dispute between the districts and the state.

Maintaining a healthy reserve in the Rainy Day Fund improves the state's credit rating, which helps reduce borrowing costs and spurs economic growth. In addition, the fund provides a safeguard to protect critical programs for Michigan's citizens should the state experience an economic downturn.

Budget Stabilization "Rainy Day" Fund

Education

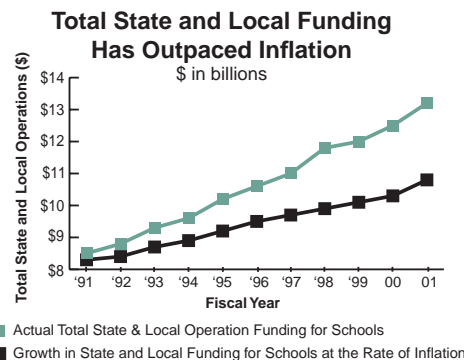

Education spending, which includes K-12 and higher education programs, remains the single largest category in the state's budget, amounting to \$11.8 billion in fiscal year 1999.

Since fiscal year 1998, the state has spent more on K-12 education than was spent in the entire General Fund General Purpose budget. Total state and local funding for schools is projected to exceed \$13.2 billion by fiscal year 2001. Total state and local K-12 spending for schools for fiscal years 1991 through 1999 has consistently outpaced inflation (see chart).

The Michigan Lottery continues to contribute significant resources to the state's public schools. Each year, the "profit" from the Lottery is transferred to the School Aid Fund where it is used to help fund the costs of K-12 schools. In fiscal year 1999, the Lottery's contribution to schools was \$621.1 million. There are currently two casinos operating in the City of Detroit. The wagering tax is 18% of adjusted gross receipts, 9.9% of this tax is collected by the City of Detroit and 8.1% is deposited in the School Aid Fund.

The Administration continues its commitment to ensuring that higher education in Michigan is accessible and affordable to all current and future students. Total state spending for Michigan's 2-year and 4-year higher education institutions amounted to \$1.9 billion in fiscal year 1999, an increase of 39 percent since fiscal year 1991.

The Department of Education's website is <http://www.mde.state.mi.us>.

Welfare Reform

Michigan's welfare reform program continues with outstanding success in reducing welfare caseloads and helping families achieve independence. The goal of the program is to encourage employment, support families, involve communities, and protect vulnerable adults and children. Various departments meet these goals by providing direct state services and supporting community-based efforts.

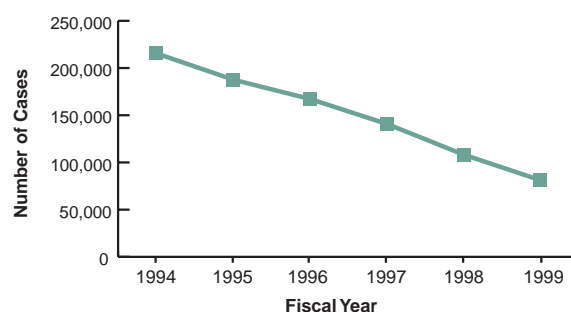

Michigan's Family Independence Program caseload (FIP), under the Family Independence Agency (FIA), has declined by more than 179,000 cases or 63 percent since September 1992. In February 2000, only 74,989 Michigan families collected FIP benefits.

Michigan FIA's cash assistance reform program is embodied in Project Zero, an initiative taking place in 49 counties. By the end of the calendar year 2000, Project Zero will expand statewide. The goal of Project Zero is to reduce to "zero" the percent of nonworking "target" FIP cases, or those cases required to work. In February 2000, 62 percent of Project Zero target cases had earned income.

Community participation and support is a key element in the Project Zero formula. Community organizations provide child care, transportation, family support, counseling services and other support services to Project Zero customers. In February 2000, more than 65,000 low-income Michigan families were receiving childcare services paid with FIA funds, representing more than 121,600 children. Expenditures of \$435 million for childcare services are anticipated in fiscal year 2000, compared to \$400 million in 1999 and \$78 million in 1992.

The Department of Career Development's Work First program helps people move from welfare dependency to work. Under this program, more than 230,000

Family Independence Program Cases

participants have been placed in employment. To continue the success of this program, Michigan is redirecting some of its resources toward job retention activities and intensive services for clients who have had difficulty securing employment.

Health care needs of low-income children are an important part of family independence. The Healthy Kids program is a Medicaid program for children in low-income families. As of early March 2000, there were 60,000 children enrolled in the Healthy Kids program. If children do not qualify under the Healthy Kids program, they can qualify under the MICHild program, a health insurance program for uninsured children of Michigan's working families. Health Maintenance Organizations and other health care plans throughout Michigan provide services to qualified applicants. As of early March 2000, there were 13,000 children enrolled in the MICHild program. Both programs are operated by the Department of Community Health.

FIA's, Career Development's, Community Health's website are <http://www.mfia.state.mi.us>, <http://www.state.mi.us/career>, and <http://www.mdch.state.mi.us>, respectively.

Future Outlook

Michigan is experiencing the longest economic expansion in U.S. history. The nation's economy continues to grow above long-term historic rates marking the fourth consecutive year in which real gross domestic product grew faster than 3.5%. In 2000, the U.S. economy and consumer confidence remain strong. The gross domestic product is expected to increase at the rate of 3.5% in 2000 and 3.2% in 2001. Car and light truck sales rose to a projected record of 16.7 million units in 1999, eclipsing the prior record set in 1986.

Michigan's economy will continue to benefit from anticipated moderate growth in employment of 65,000 in 2000 and an additional 53,000 jobs

Clean Michigan Initiative

In 1998, the voters passed the Clean Michigan Initiative (CMI), a \$675 million environmental bond program. Proceeds generated from the bond issuance will assist in land and water environmental clean up throughout the state and provide for critical infrastructure improvements at state and local parks.

The Department of Environmental Quality will administer \$570 million of the total CMI authorization. A total of \$194 million is now available for several environmental projects. The majority of funding is targeted for redevelopment projects, including \$77.5 million for brownfield sites and \$50 million for waterfront properties. Cleanup efforts in areas across Michigan will prepare sites for economic redevelopment, increasing financial investment, creating jobs, and revitalizing community waterfronts. To protect and improve water quality, \$38.7 million is provided for implementing watershed plans, monitoring water quality, and conducting water pollution control, wellhead protection and stormwater treatment activities. Pollution prevention efforts will receive \$18 million to help small business owners identify pollution prevention opportunities with the assistance of retired engineers, and make loans available to implement these recommendations. Other pollution prevention strategies include the development of an environmental education curriculum, household hazardous waste collection, and pollution prevention grants targeted to areas with environmentally-sensitive natural resources. A total of \$9.5 million is designated for the protection of rivers, lakes, and streams, allowing aquatic life to thrive and lessening the need for fishing and wildlife consumption advisories.

The Department of Natural Resources will oversee \$100 million of the total \$675 million CMI authorization. More than half of the \$50 million dedicated for state park infrastructure projects has received budget approval. The department will utilize \$28.2 million to implement the first three years of a five-year park improvement plan to revitalize state parks. An additional \$50 million, earmarked for local recreation grants, is in the initial stages of implementation. First round applications have received \$11.5 million to support local parks and recreation programs across the state. Funding of \$12.4 million for 66 additional local projects currently awaits appropriation.

The Department of Community Health (DCH) received \$5 million to remove hazardous lead paint in private homes with families whose children have elevated levels of lead in their blood. Applications are available on the DCH website or at local county health departments.

The respective website addresses for the departments of Environmental Quality, Natural Resources, and Community Health are located at <http://www.deq.state.mi.us>, <http://www.dnr.state.mi.us>, and <http://www.mdch.state.mi.us>.

E-Commerce

With the rapid advancement in computers and use of the Internet, the State is pushing forward to implement new technology to interact with the public and businesses. The State has launched e-Commerce initiatives involving three separate projects that are in various phases of implementation.

The Electronic Funds Transfer (EFT) project is a major effort to pay vendors and employees with EFTs, significantly reducing the number of payments by paper check. The State currently pays its vendors about 11 million paper checks annually. Second, e-Invoice, a pilot program involving Consumers Energy and the Michigan State Police, involves the use of electronic billing from vendors. The State plans to expand the project to include other vendors and departments. Third, E-Michigan is a comprehensive, long-term project to develop a seamless interface for the global marketplace to access all applications of Michigan state government. This project, now in the planning phase, will involve agencies of government working together to ensure the public can use the internet to more easily conduct business with, and to get information about, Michigan and its government.

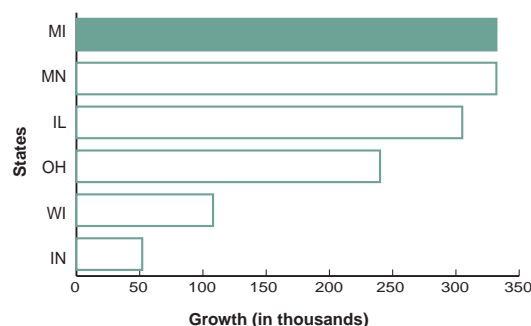

Michigan Economic Summary

The economy in Michigan continues to thrive and grow. As described below, many economic indicators in Michigan are positive:

New Facility Construction—In 1999, for the third consecutive year, Michigan led the nation in new manufacturing investments, attracting 2,174 new major projects or expansions. According to *Site Selection* magazine, Michigan announced more new projects or expansions in 1999 than any state.

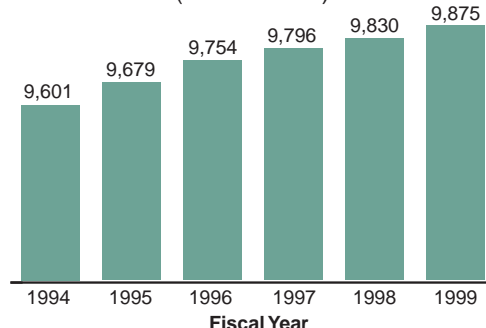

Job Growth—For a four-year period ending in 1999, Michigan created more jobs than any other Great Lake state.

Job Growth in the Last 4 Years in the Great Lakes States

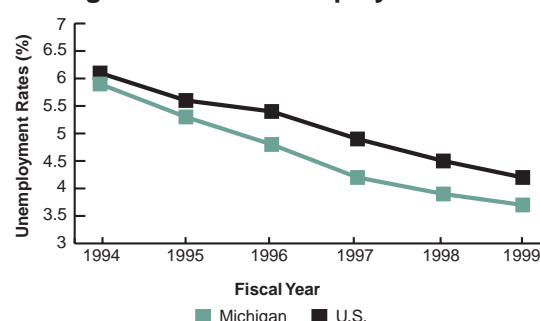

Population—Michigan continues to attract people to live in our magnificent Great Lake state. Over the last five years ending 1999, the population grew 2.9%.

Population Growth in Michigan (in thousands)

Unemployment—The unemployment rate in Michigan averaged 3.7% in 1999 while the U.S. average unemployment rate was 4.2%. The latest unemployment rate (2.7%) was the lowest since the 1970s and is the eighth consecutive year that Michigan's unemployment rate has declined.

Michigan and U.S. Unemployment Rates

Bolstering the Economy—The Unemployment Agency announced that a healthy reserve in the state's unemployment insurance trust fund has resulted in a \$200 million tax cut that Michigan employers saw in their December tax bill. This was the fifth straight year employers received unemployment tax relief. The Unemployment Agency estimates most of the state's 210,000 employers who pay unemployment taxes will see a 10 percent or more reduction in their taxes.

Transportation

The Michigan Department of Transportation (MDOT) is responsible for the construction, repair, and maintenance of 1,862 miles of freeway and 7,729 miles of non-freeway routes on the state trunkline system. MDOT also maintains bridges and structures that cross over water, highways, railroad tracks, and other roads, including the 5-mile long suspension Mackinac Bridge. MDOT also manages federal and state funds available to local units of government to maintain a network of local roads, bridges, public transit systems and public airports.

MDOT recently published volume two of its "Five Year Road and Bridge Program" to improve our transportation system. The department's goal is to increase the percentage of freeway and non-freeway roads in good condition from 77% in 1998 to 82% in 2004 and then 90% in 2007. As part of the *Build Michigan II* plan initiated in 1998, MDOT is planning to rebuild or repair 6,625 miles of state highways, rehabilitate 1,400 bridges, and construct six new expressways over the next five years, investing a record \$6.4 billion in state and federal funds in Michigan's transportation infrastructure. The plan will devote 90% of the funds toward repair and reconstruction of our existing state trunkline system, including increased investments in routine and capital preventive maintenance.

With the *Build Michigan II* plan in progress, a new plan, *Build Michigan III*, was recently announced. Under the new plan, an additional \$1 billion will be committed to road repair projects for the years 2000-2004.

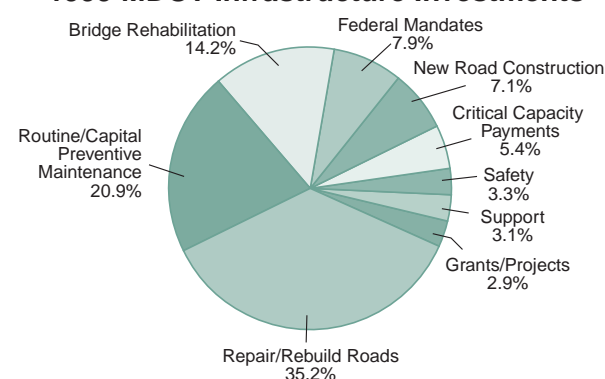

To help finance these projects, the State issues revenue bonds. At September 30, 1999, the State had \$859 million in bonds outstanding for transportation projects.

Standard & Poor's recently upgraded the bond rating for the State Trunkline Fund and the Comprehensive Transportation Fund from AA- to AA. The changes to a better rating were due to the state's strong economy and solid road improvement plans in progress. The rating affects interest rates on bonds issued for transportation projects.

The attached chart shows the breakdown of all of the investments made to our infrastructures in 1999. The total amount invested was \$1.23 billion.

MDOT's website is located at: <http://www.mdot.state.mi.us>.

1999 MDOT Infrastructure Investments

Pension Fund Management

The State of Michigan has an active workforce of about 64,000 employees and it provides various pension benefits to these employees and its retirees. DMB's Office of Retirement Services (ORS) funds and administers these benefits through three major retirement systems and provides administrative services to over 500 public schools in a fourth system.

The State of Michigan paid a total \$300 million for pension and health contributions to the State Police, Judges, and State Employees' Retirement Systems. During fiscal year 1999, the Public School Employees Retirement Fund (PSERS) received \$921 million from participating public school employers for pension and health benefits.

As of September 30, 1999, the four systems combined had net assets of \$48 billion. The four systems paid almost \$2 billion in pension benefits and \$573 million in health benefits to retirees and their beneficiaries. Combined, the four retirement systems have 377,793

active members and 160,021 retirees for a total population of 537,814.

The State Treasurer is the investment manager of the funds of the retirement systems and has the authority to invest in stocks, corporate and government bonds and notes, mortgages, real estate, venture capital, and other investments. The assets in the pension funds are invested solely for the interest of the participants and beneficiaries of the plans, and defray reasonable expenses related to the administration of the plans. All three of the State's major pension plans are fully funded and the PSERS is 99.3% funded. For fiscal year 1999, the net investment earnings rate ranged from 15.5% to 16.3% and totaled \$6.8 billion.

Information regarding the various retirement plans can be accessed at the following website: <http://www.state.mi.us/dmb/ors>.

Financial Reporting and Fiscal Oversight

The State of Michigan uses sound accounting practices, called generally accepted accounting principles (GAAP), to account for all assets, liabilities, revenues and expenditures of the state. This detailed accounting information is maintained within the Michigan Administrative Information Network (MAIN) system. Using MAIN, the Office of Financial Management (OFM) prepares and publishes the *State of Michigan Comprehensive Annual Financial Report* (SOMCAFR). The report is audited by the Legislative Office of the Auditor General. Four years ago, Michigan was 33rd in the nation in the time required to publish the SOMCAFR. When the state published its fiscal year 1999 SOMCAFR, Michigan ranked 8th in the nation among the 50 states.

For the fiscal year ended September 30, 1999, all state departments remained within their appropriated budgets and the state ended the year with a \$1.58 billion total fund balance in the General Fund all of which is reserved for specific programs or activities.

In June 1999, the Governmental Accounting Standards Board promulgated a revised reporting model that will significantly affect how the state will report its information in the SOMCAFR. The new model will restructure the financial statements in the SOMCAFR with the goal of having the government report its operations more like a business enterprise. It is Michigan's intent to implement this model by 2001, one year ahead of the required deadline.

For the twelfth straight year, the State achieved the Certificate of Achievement for Excellence in Financial Reporting award from the Government Finance Officers Association (GFOA) for the 1998 SOMCAFR. GFOA also presented Michigan with the Award for Outstanding Achievement in Popular Annual Financial Reporting for its 1998 publication of the *Michigan Financial Focus*, which was issued in 1999.

Michigan Department and Agency Directors

Department	Executive Officer/Title	Phone Number (517)
